InstrumentStudio

G Web Development SW

Software for Professional Test Workflows

Electronics Validation Test

Characterizing electronic prototypes to ensure quality and performance

Set-up & Configure

Measure & Automate

Analyze & Share

Electronics Production Test

Functional test ensuring manufactured products meet specifications

Set-up & Configure

Measure & Automate

Deploy & Maintain

Electromechanical Validation Test

Characterizing physical prototypes to ensure quality and performance

Build & Customize

Configure

Analyze & Share

Embedded Software Test

Testing deployed software for defects across wide parameter variations

Configure & Map

Test & Bring Up

Automate & Execute

Today's Software

Increase test coverage and decrease development time with validation and production software.

InstrumentStudio
Interactive measurement and
monitoring software

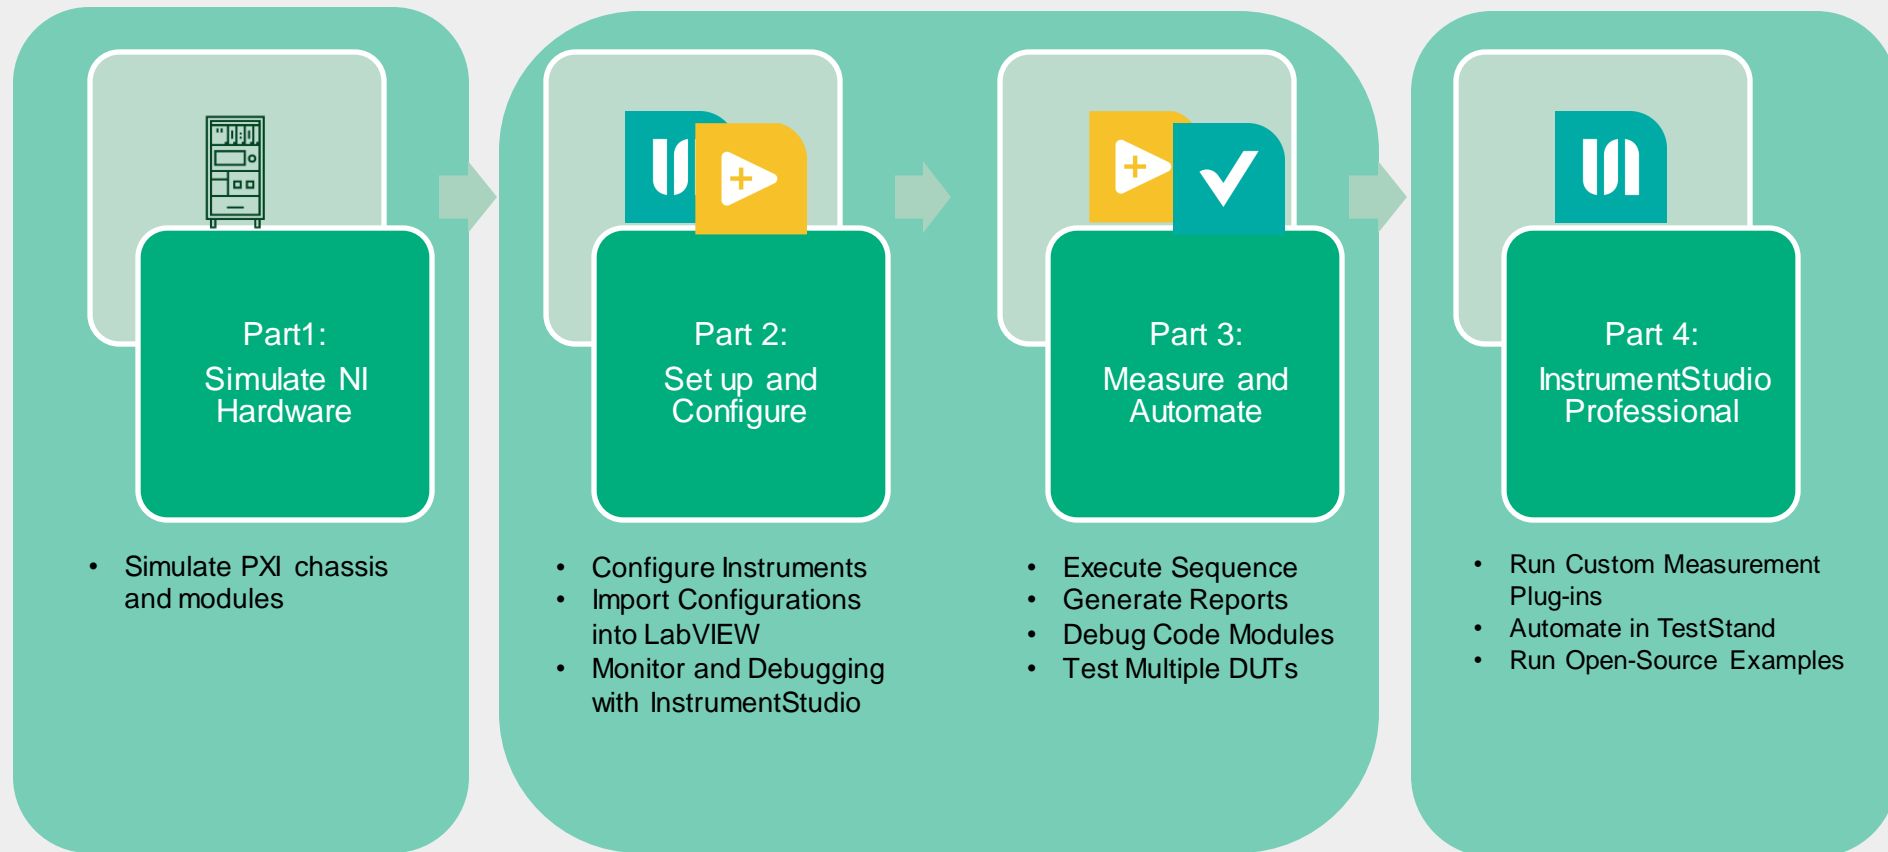

LabVIEW
The industry-standard for instrument
control, can connect to any device

TestStand
A test executive software for building validation
and production test systems

What to expect from this session

Additional NI Connect Sessions

InstrumentStudio Pro: A Low-code Environment for Manual and Automated Measurements

Tuesday, May, 21

3:15p - 4:15p

17A

That's the Suite Life! A Session on the LabVIEW+ Suite

Tuesday, May, 21

3:15p - 4:15p

19A

What's New in LabVIEW?

Wednesday, May, 22

10:15p - 11:15p

19A

What's New in TestStand

Wednesday, May 22

1:30p – 2:20

19B

Make Measurement Reuse Your New Superpower

Wednesday, May, 22

2:45p - 3:45p

19B
